FUN FACTS

As a morning person, I am always the first to tackle debugging.

Music keeps me focused and motivated while coding.

I'm aware that there are digital note-taking apps. But I prefer the old-fashioned way of taking notes with a pen and paper.

MY SUPERPOWER

I tackle challenges head-on, with a fearless spirit and an insatiable hunger for knowledge.

Viktoria Bors - Pajuste
From Lab to Web

ABOUT ME

What does a highly educated person do when they're tired of listening to Baby Gaga and playing peek-a-boo?
They fall in love with web development, it's the ultimate cure for Gaga fatigue and peek-a-boo overload.

RELEVANT WORK EXPERIENCES

Junior JavaScript (Vue Js) Developer   2022. September - Now
Formula 400

I am currently employed at a company specializing in the development of web apps and software platforms for insurance companies. In this role, I am tasked with updating product descriptions and implementing new products through a combination of front-end and back-end development. My responsibilities includes utilizing web services to make updates on the back-end, as well as utilizing Vue.js and Node.js for front-end development to ensure new products were seamlessly integrated into the user interface.

EDUCATION

Full stack webdeveloper   2022. January - 2023.March
ProOktatas • Bootcamp

Successfully completed a part-time bootcamp program, which entailed five hours of weekly classes and ample time for individual practice. I excelled in the frontend module, achieving a 98% on the theory exam. Additionally, I demonstrated proficiency in the JavaScript module, obtaining a 100% score on two written coding exams. All of my projects were awarded top grades.

I am currently engaged in the backend module, which comprises of PHP and MySQL. I anticipate completion of this module in March, which will provide me with a comprehensive understanding and insight into backend development.

Relevant projects:

- Bows Cafe - https://examprojekt.vercel.app/ - focus on front end technology (Bootstrap 5)
- Spacerock - https://spacerockvue.onrender.com/index - full stack exam project as part of the JavaScript module, utilizing Vanilla JavaScript, Express.Js, and MongoDB. The project is a CRUD application that allows users to search for Moon-like materials, and upon registration or login, the user can also add, modify, or delete samples. This project has been updated and rewritten using the Vue framework.

Google Certified IT-Support Specialist   2022. July - 2022. September
Green Fox Academy and Inco Academy

I completed a Google certified IT-Support Specialist program, which consisted of five modules: Technical support, Operating Systems, Computer Networking, IT Infrastructure Services, and IT Security. The program provided me with a comprehensive understanding of various network protocols, Linux command lines, Windows operating systems, and system administration.

OTHER WORK EXPERIENCES

Chemist   2016.June - 2022.April
SGS Analytics Denmark • Full-time

I have experience with various analyzes of drinking water, wastewater, sludge and building materials.

For 6 years in the laboratory I have worked in 3 different departments where my personality and work etiquette could fit well with all the teams. This could happen because I can learn up new things quickly and effectively. During the years I have learned more and more instruments and analyzes. In the end I became the person who knew almost every analyzes in the laboratory. It also means I can find the way to be accepted in different groups.
